Performance

Fabrics

Where performance and technology merge, creating the finest high quality innovative stretch fabrics available for the Active sports market.

FEATURES AND BENEFITS

- Sustainable
- Smooth and soft
- 20% flatter
- Compression power
- Shape retention
- Maximum durability
- UPF 50+ sun protection
- Extra strength
- Outstanding quality
- Premium quality Carvicoproduct
- Branded Xtra Life LYCRA®

New sustainable Carvico techno-fabric made with Econyl® - 100% regenerated nylon and polyester fiber from post-consumer materials. Due to the latest yarn and knitting technologies, it is 20% flatter than your normal Matt Nylon LYCRA®, even though it still has the same power and coverage. The fabrics flat surface is the perfect platform to apply your own sublimation print, creating a magnificent crisp, clean finish.

VITA also has 4 times more fabric compression power capacity than competitors fabric with other elastane, which is essential for the active sports industry.

The colours marked as polyester have been manufactured using a polyester fiber to achieve the highest colour fastness values technically possible for these colours.

ACTIVE

Sensitive is a coordinated system of versatile, high-performing fabrics. Thanks to its patented knit structure, it gives you characteristics which add value to garments by raising their performance and aesthetic qualities.

The Sensitive fabric system is unequalled for the versatility with which it is possible to create extremely high-performing garments for water sports as well as complete ranges of coordinating Active wear, from high performance wear to accessories.

The most technologically advanced solution for Active wear, which guarantees the highest quality, durability, comfortability and protection from UV rays.

SENSITIVE FEATURES AND BENEFITS

Super Comfortable:

All garments created with Sensitive fabrics are more comfortable and pleasant to wear.

Extraordinarily Soft to the Touch:

Sensitive allows you to create garments that fit like a second skin.

Ultra Fine and Extremely Light:

The much reduced thickness of Sensitive allows for the creation of garments that guarantee exceptional wear ability and elegance without losing elasticity or shape.

Perfectly Uniform:

The smooth, homogeneous surface gives a particular brightness the fabric and brilliance to the colours.

Breathable:

The open knit of the fabric ensures breath ability and therefore is better for the body.

Absolutely Easy Care:

Sensitive has characteristics which make it very practical and resistant to washing, keeping its colour and shape intact.

SENSITIVE FIT LYCRA®

The original Sensitive fabric is a perfect mix of microfiber with 28% LYCRA® fiber which guarantees the best aesthetic and functional characteristics.

Discover all of the incomparable performance features the Sensitive Classic fabric entails which includes; extra comfort, body moisture wicking, quick drying, sun blocking, extra fine, chlorine resistance, no pilling, easy care and wrinkle free.

ACTIVE

Atechnologically advanced classic Matt Xtra Life LYCRA®range, with the perfect balance between lightness and elasticity. Carvico Matt fabrics have been awarded the prestigious Xtra Life LYCRA®certificate thanks to their unprecedented array of outstanding features. They are chlorine and abrasion resistant, UPF 50+, and remain unaltered over time.

All fabrics are of the highest quality standard, durable, comfortable to wear and have great stretch and recovery. They also contain different levels of fabric compression power due to the Xtra Life LYCRA® content, which is essential for the active sports industry.

Garments made with Xtra Life LYCRA®Fiber can stretch, but more importantly they have excellent recovery performance so that garments can keep their shape. Designers around the world are using Xtra Life LYCRA® Fiber, allowing people to wear stylish supportive garments that last.

Perfect Fit:

CARVICO FEATURES AND BENEFITS
The extreme elasticity of the fabrics enhances its shaping power and comfort, and guarantees maximum freedom of movement to the user.

Shape Retention:

The high modulus translates in the perfect degree of muscular compression and support, while its recovery power allows the fabrics to follow your every movement ensuring a perfect fit under any circumstances.

Ultra Chlorine Resistant:

Xtra Life LYCRA® Fiber resists fabric breakdown more than 5 times longer than your average chlorine-resistant spandex.

Excellent Coverage:

The advanced knitting technology and construction makes the fabrics compact and dense, creating great coverage.

Excellent UV Protection:

The tight knit also works as a filter against the sun's harmful rays, ensuring a UPF 50+ protection factor.

Atlanta Plus, the high performance fabric par excellence, offers the perfect muscular compression, it decreases muscular vibrations and strain and improves athletic performance.

It is therefore ideal for sportswear, even the most extreme. It is resistant to pilling, abrasions, chlorine, sun creams and oils and ensures the best fit over time.

FEATURES AND BENEFITS

- Premium quality
- Extra softness
- Extra strength
- Breathable
- Moisture absorbent
- Natural product
- Durable
- Great fit and comfort
- Branded LYCRA®

Our premium Combed Cotton LYCRA® range boasts an array of fresh rainbow colours, forecasted and researched to suit the active sports and dancewear markets.

Cotton, being a natural cellulose fibre, is perfect for the Australian market with our hot climate and outdoor lifestyles. Eclipse Textiles' cotton has the added benefit of also being combed, which gives our fabric a premium finish. This process involves taking out the shortest additional fibres of a batch, resulting in a high-quality fabric with excellent strength and softness.

Also, with the benefits of Invista's LYCRA® product, it holds shape and retention to support an active lifestyle.

Polyester Sublimation

Even though all of these fabrics are polyester based, each one is unique in regards to its knit construction, yarn performance, and fabric behaviour in general. They are designed specifically for targeted end use, are of the highest quality standard, and all of them create an outstanding dynamic, crisp, clean printed finish with no yellowing and minimal shrinkage.

SUBLIMATION BASES

VITA POLYESTER XTRA LIFE LYCRA® SUBLIMATION BASE

New sustainable Carvico techno-fabric made with Econyl® - 100% regenerated polyester

MATT POLYESTER XTRA LIFE LYCRA® SUBLIMATION BASE

Carvico's Matt Polyester Xtra Life LYCRA® fabric meets the highest quality standards for sublimation technology. The benefits of Invista's Xtra Life LYCRA® yarn technology, combined with the natural benefits of Polyester, make this product the perfect choice for a sport or swim sublimation base. The hard wearing, quick drying and maximum durability of Polyester, combined with Invista's LYCRA® quality, creates a crisp matt printed finish, whilst still holding its shape and retention.

SUBLI-SPORT XTRA LIFE LYCRA® SUBLIMATION BASE

Subli-Sport Polyester is a warp knit nontransparent fabric containing ceramic core technology. The Polyester yarn contains ceramic within the central core of its filaments. This technology prevents the “see-through” effect, in turn creating a UV blocking fabric. Due to the yarn construction, it also creates a cooling effect by reflecting the heat rays, thus keeping the wearer cool and refreshed. Subli-Sport is the perfect solution for sublimation printing when working with large white areas due to the non-transparent effect it creates.
